

Keep the Future as Fresh as today

Lamipacker® LPD3223

CLIVIA

4 roller Laminator A3 size

Protects, Preserves and Enhances your documents

**Temperature
Control**

easy setting

**Reverse
Switch**

prevents paper jam

**Film
Thickness**

from 80 to 150mic.

**Auto
Heat Off**

for energy saving

Designed specially for home users and small office users.

Equipped with safety measures such as Reverse Switch and Auto Heat Off.

4 roller transport mechanism for better production and quality.

saving

Laminating Speed
0.43m/min

Warm up Time
5-10min

Equipped with useful functions for safety and comfort. Paper jams can be prevented by using the roller reverse switch. The heat will switch off automatically after an hour for Safety and for Energy saving. The machine can laminate films up to 150micron.

Features

- Operation is simple: Suitable for use at home, office, or any other place you like.
- To achieve a quality finish a 4 roller transport mechanism is built into this compact laminator.
- Temperature setting is easy: Just choose the right setting for your lamination.
- Reverse switch enables you to prevent paper jams.
- Auto Heat Off: ideal for saving energy. After continuous running of one hour, the heating up will stop automatically.
- Laminating speed: 430mm/min. Laminates an A4 sheet in 42 sec.
- Warms up and gets ready in 5 minutes.
- Detachable wide tray at the rear will enhance the lamination outcome.

Specifications

Model	Lamipacker CLIVIA A3
Item No.	LPD3223
Max.Laminating Width	335mm (A3)
Max.Laminating Thickness	0.6mm (including film thickness)
Laminating Speed	430mm/min. (50Hz) 520mm/min. (60Hz)
Laminatable Film Thicknesses	80 -150 microns
Warm-Up Time	Approx. 5 -10 min.
Heating Method	4 roller / external heating system
Power Source / Power Consumption	AC 220-240V (50/60Hz) / 520W
Dimensions / Weight (excl. Rear Tray)	534 (W) x 175 (D) x 120 (H)mm / 5.6kg
Attachments	Cleaning paper, Users Guide
Remarkable Function	Reverse Function / Auto Heat Off
Package Size / Weight	590(W)x220(D)x150(H)mm / 6.3kg
Carton Size / Weight	605 (W) x 475 (D) x 290 (H)mm / 2 units / 14.3kg

*Warm-up time depends on room temperature.
*Specification may be modified without prior notice.

Our patent product

Effects

- As a result of lamination, the efficiency of durability and water resistance is improved and the laminated object is protected from scratches, stains and water.
- The color printing is not only more durable but also more vivid as lamination process makes surface of the laminated object flat and smooth.
- The laminated objects, such as documents or printed materials, are completely sealed and protected from oxidization of ink, color fade-out or changing colors.
- By choosing film from various sizes and thicknesses, the lamination possibilities will be widened at home or in the office.
- It is also possible to obtain the UV cut effect.

Lamination Film

It is recommended to use our genuine FUJIPLA "CP-Leaf".
Use of other films may cause trouble (e.g. jamming etc.)

⚠ Safety Warning

- Read the instruction manual thoroughly before operation to avoid danger and failure of the lamination.
- In the cases listed below, please stop operation, unplug and contact your FUJIPLA dealer immediately.
 - The power supply cord or plug gets unusually hot.
 - Strange smell or smoke comes out.
 - Water or foreign objects get inside the machine.
- Warning and caution signs are omitted in the photographs run on this catalogue.
- Specification and appearance of the product may change for improvement reasons without notice.
- Maintenance parts for maintenance service are available for a minimum of 5 years after cessation of the manufacture of product.

This catalogue is valid as of March 2011.
