

2 roller Laminator A4/A3 size

Airy, Friendly, A Daisy!

Lamipacker® LPD2325 LPD3225 DAiSY

Temperature Control
easy setting

Reverse Switch
prevents paper jam

OK!
Film Thickness
from 80 to 150mic.

AUTO
HEAT OFF
for energy
saving

Laminating Speed
430mm/min

Warm up Time
5 - 8 min

Lamipacker DAiSY, a versatile, compact gadget for home and office use.

Equipped with useful functions for safety and comfort. Paper jams can be prevented by using the roller reverse switch. The heat will switch off automatically after an hour for Safety and Energy conservation. The machine can laminate films up to 150micron.

Features

- Operation is simple: Suitable for use at home, office, or any other place.
- Temperature setting is easy: Just choose the right setting for your lamination.
- Reverse switch prevents film from jamming.
- Auto Heat Off: Ideal for saving energy. After continuous running of one hour, the heating will stop automatically.
- Laminating speed: 430mm/min. Laminates an A4 sheet in 42 sec.
- Warms up and gets ready to use in 5 minutes.
- Detachable wide tray at the rear will enhance the lamination outcome.

Specifications

Model	Lamipacker DAiSY A4	Lamipacker DAiSY A3
Item No.	LPD2325	LPD3225
Max.Laminating Width	230mm (A4)	320mm (A3)
Max.Laminating Thickness	0.6mm (including film thickness)	
Laminating Speed	360mm/min. (50Hz) 430mm/min. (60Hz)	
Laminatable Film Thicknesses	80 -150 microns	
Warm-Up Time	Approx. 5 - 8 min. *	
Heating Method	2 roller / external heating system	
Power Source / Power Consumption	AC 220-240V (50/60Hz) / 300W	AC 220-240V (50/60Hz) / 480W
Dimensions / Weight (excl. Rear Tray)	375(W) x 130(D) x 95(H) mm / 2.0kg	465(W) x 155(D) x 107(H) mm / 3.1kg
Attachments	Rear Tray, Cleaning paper, Users Guide	
Remarkable Function	Reverse Function / Auto Heat Off	
Package Size / Weight	404(W) x 126(D) x 172(H) mm / 2.4kg	492(W) x 133(D) x 183(H) mm / 3.6kg
Carton Size / Q'ty / Weight	430(W) x 368(D) x 293(H) mm / 4 units / 10.6kg	515(W) x 397(D) x 170(H) mm / 2 units / 8.1kg

*Warm-up time depends on room temperature.
*Specification may be modified without prior notice.

Our patent product

Benefits

- Lamination provides the document with a durable and water resistant jacket which provides protection from Scratches , Stains and Moisture.
- Colour Prints are not only more durable but also Vivid and Alive as the process makes the surface Flat and Smooth.
- Laminated objects, such as documents or printed materials, are completely sealed. The effect of oxidization of ink, i.e. color fade-out or changes, will be minimized.
- Using Film in a variety of sizes, thickness and finishes makes the Lamination possibilities extensive. Especially for those applications where protection from harmful UV rays is important, Fujipla UV Cut Pouches are essential.

Lamination Film

It is recommended to use our genuine FUJIPLA "CP-Leaf". Use of other film may cause problems such as jamming.

! Safety Warning

- Read the users guide thoroughly before operation to avoid danger and failure of the lamination.
- In the cases listed below, please stop operation, disconnect and contact your FUJIPLA dealer immediately.
 - The power supply cord or plug becomes unusually hot.
 - Strange smell or smoke comes out.
 - Water or foreign objects are inside the machine.
- Warning and caution signs are omitted in the photographs run on this catalogue.
- Specifications and appearance of the product may change for improvement reasons without notice.
- Maintenance parts for maintenance service are available for a minimum of 5 years after cessation of the manufacture of this product.

This catalogue is valid as of December 2012.
